Your **Sustainable Energy Community** journey

In Wicklow SECs partner with Wicklow CoCo.

1. The Consultant is provided for the EMP (3CEA)
2. All payments are made by Wicklow CoCo
3. No requirement for fund raising for the EMP

Your Sustainable Energy Community journey

Really Easy To Join – Just click the button and fill out a short form

Join the Sustainable Energy Network

IN THIS SECTION

[When to join](#)[Benefits of joining](#)[How to join](#)[You will need](#)[Join the network >](#)

Is your community group ready to learn more? Join the network to identify and achieve your sustainable energy community goals.

When to join

Once you establish your community group, take the next step and join the sustainable energy network. At this point it is ideal if your group includes a wide range of energy users in your community.

Benefits of joining

You will be assigned a local mentor who can provide guidance and support. Your community will be able to learn about energy technologies and solutions. This will help you to start thinking about energy use in your own community in an informed way. Your mentor will be able to share solutions and examples from other communities similar to your own.

[Chat with us!](#)

Joining entitles you to 1 day (8 hours) of Mentor Support to get you started
